

**ARTech Laboratory, Inc.
Checklist**

Nose

- Please read “Photo & Model Policy”**
- Photos of patient before amputation, if available. If not, photos of a family member or other nose they would like.
- Photos taken *before casting*.
- Please read “Nose Casting Procedure”**
- Dental stone impression of residual.
- Measurements completed on Work Order
- Color choices completed on Work Order

If the patient has had a prosthesis previously, it would be helpful to us to have it, or at least a photo of it. They usually want the new prosthesis to look similar to the one they are using now unless there is some problem with the current one.

We do not need a lot of photos that are different colors. One or two photos of each angle, if they are color-true, will be sufficient.

It is not necessary to return the color chart with the models, unless you used one printed off our web site.

The very best way to ship stone models is to wrap them (after drying) in bubble wrap.
